OBJECTIVE

Portfolio

Software Engineer with hands-on experience at Comcast in backend and middleware systems using Java, Python, and TIBCO. Currently pursuing a Master's degree in Data Science and AI at the University of Central Missouri to deepen expertise in building scalable, data-driven solutions. Seeking to contribute to high-impact projects involving intelligent automation, cloud computing, or machine learning.

EDUCATION

Master's in Data Science and Artificial Intelligence

University of Central Missouri, Lee's Summit, Missouri, USA

2025 - Present

Relevant Coursework: Data Science and AI (A), Deep Learning (B), Big Data Analytics (C), and NLP (D).

Aggregate: NA%

Bachelor of Computer Science

Kalasalingam University, Madurai, Tamil Nadu, India

2020 - 2024

Relevant Coursework: Java (A), Data Structures (B), AI-Machine Learning (C), and MySQL (D).

Aggregate: 87.8%

SKILLS

Technical Skills	C, Java, Python, MySQL, PostgreSQL, DSA, Excel, TIBCO BW, HTML, CSS, JS
Tools	Git, Github, Docker, Jenkins
Technologies	Artificial Intelligence, Machine Learning, Data Science, Java and Web Development
Scripting Languages	Shell Scripting (Bash), Unix Scripting
Soft Skills	Leadership, Teamwork, Problem-solving, Agile, Scrum

WORK EXPERIENCE

CRM Tibco Application Development - Full Time Employment

Jul 2024 - Jul 2025

Development Engineer 1 At Comcast

Chennai, India

- Developed and implemented TIBCO BW solutions for CRM integration, improving data flow & system efficiency.
- Created and maintained APIs to enable real-time data exchange between CRM and other business systems.
- Automated workflows using TIBCO BusinessWorks & TIBCO Admin, enhancing operational efficiency by 30%.
- Integrated multiple CRM platforms with Salesforce, SAP, and Hermes using TIBCO Business Connect.

CRM Tibco Application Development - Internship

Jan 2024 - Jun 2024

Development Engineer 1 At Comcast

Chennai, India

- Developed TIBCO-based integrations for CRM applications, enhancing system performance and reliability.
- Conducting research and analysis to support ongoing project development and optimization.
- Supporting senior developers in implementing CRM solutions using TIBCO technologies.
- Troubleshoot production issues, ensuring minimal downtime and fast resolution.

Web Development - Self Employed

Sept 2023 - Dec 2023

Usurp HR Tech Solutions

Remote, India

- Developed a dynamic & responsive user interface using HTML, CSS, & JS, ensuring seamless user experience.
- Utilized Django to build robust backend functionalities, manage authentication, & enhance security features.
- Integrated RESTful APIs to facilitate smooth data exchange between frontend and backend services.

PROJECTS

Copernico – New Payment System Using TIBCO (03/2025 - Present)

The system enables real-time payment processing, supports multiple payment gateways, & enhances transaction reliability. This solution improves transaction speed, reduces failures, & enhances the payment processing efficiency.

Migration from TIBCO FOM to Spring Boot with Flowable BPM (12/2024 - 02/2025)

Migrated the existing Order Management System from TIBCO FOM to a Spring Boot microservices architecture with Flowable BPM for business process automation. Replaced TIBCO workflows with Flowable BPMN, enabling efficient order processing. Integrated Kafka for event handling & REST APIs for seamless communication. This migration improved performance, scalability, & automation, reducing order processing time and operational overhead.

AOM Kafka Resubmission System Using TIBCO (07/2024 - 11/2024)

Developed an AOM Kafka Resubmission System using TIBCO BW to enhance message reliability and processing efficiency. The system ensures seamless resubmission of failed Kafka messages, reducing data loss and improving real-time processing. Includes automated monitoring, logging, and error-handling mechanisms, allowing efficient recovery of unprocessed messages. This solution optimizes workflow management and ensures high availability in enterprise messaging systems.

AI-Driven Billing Assistant Using Mobile Vision and Web Development (03/2024 - 07/2024)

The project aims to enable customers to create their bills using their mobile phones. By scanning QR codes, users can access self-billing functionality. Additionally, they can capture bill images with their mobile cameras for secure billing transactions. This streamlined process enhances convenience and ensures accuracy in transactions.

Email Spam Classification Using Machine Learning (08/2023 - 03/2024)

spam detection employs rule-based filters, Bayesian filtering, and machine learning to sift through incoming emails, safeguarding users from unwanted messages. This enhances email security and ensures users receive only relevant and secure messages, promoting productivity.

PUBLISHED PAPERS

TITANIC SURVIVAL ANALYSIS USING LOGISTIC REGRESSION (01/2023-05/2023)

A logistic regression analysis of an extensive data set on the Titanic passengers is presented which tests the likelihood that a Titanic passenger survived the accident–based upon passenger characteristics.

ACHIEVEMENTS & CERTIFICATES

- 2022 IBM 24hrs Hackathon
- 2023 Oracle Cloud Infrastructure Data Science Professional
- 2023 AWS Academy Machine Learning
- 2023 AWS Academy Cloud Foundations
- 2024 Postman API Fundamentals Student Expert
- 2024 IBM Artificial Intelligence And Machine Learning Graduate

EXTRA-CURRICULAR ACTIVITIES & INTERESTS

- Content Creator on Instagram
- Travelling
- Design
